CV - Web App

Converted the traditional CV into an interactive and immersive python web application

Algorithmic Trading - Web App

Extracts OHLC data for various asset classes for Yahoo Finance and identifies unique chart patterns

Work Experience

IBM | 2 yrs 2 months | Oct 2020 - Present

Data Science & Analytics - Core Marketing Analytics

Job Description

As a part of the core marketing analytics team, I assist in setting the data strategy by leveraging marketing data and IBM systems to shape, direct and target marketing activities.

Project Experience

Patterns of Interest - IBM Marketing (World Wide)

Patterns of Interest is an analytical project which aggregates individual level interactions such as visits, registration, events & trials; along with intent level data such as competitive search & product reviews at an **Account, Market and Product level.**

This project has been reinforced using Supervised Machine learning using a **Random Forest Model** which helps us identify the factors that are important in lead creation and the probability of creation for various accounts across product category.

Project Yield - IBM Partner Ecosystem (World Wide)

Project Yield was a marketing initiative to assit **IBM Business Partners** in identifying leads most likely to convert based on historical trends

These insights would help business partners prioritize business action towards these leads. It would also enable IBM to assist these partners with **Co-Marketing funding** to improve pipeline yield.

Audience database curation & Analytics

The purpose of this project was to create a **database of prospective clients** belonging to the Consumer Tech industry for the **IBM Z LinuxOne product** marketing team.

Deployed a **web scrapper** built in Python using the **web testing module Selenium** that extracts information such as Company Name, Industry & Mkt. Cap which is mapped to IBM Business units.

Tata Technologies | 35 months | July 2015 - May 2018

Design Engineer - Aerospace Manufacturing Services

Work Content

Client - Magellan Aerospace, tier-1 supplier of aerospace components to Airbus.

Designed CNC machining programs & zero contact inspection programs for wing components belonging to the A330, A350 & A380 class of airliners.

Responsible for creating and reviewing quality assurance documents to standardize machining process and ensure high quality deliverables in a lean manufacturing environment.
